## UNDER TABLE X-RAY SHIELDS

Primarily designed to prevent lower body exposure to scattered radiation, these units may be used on any table where x-ray fluoroscopy is used. Flexible 0.5mm lead equivalent overlapping curtains are attached to an aluminum alloy pivotal arm. This arm can swivel away from the table side to form a side wing

### S-314A SINGLE PIVOT

- 35" wide x 28" high
- 16" Pivoting side wing
- 16" high removable top shield

### S-403 SINGLE PIVOT
